GAME DEVELOPER EXPERIENCE

Freelance
May 2026 — Present

Freelance contractor providing Game Design and Technical Game Design solutions for various client projects. Services include technical implementation, combat design, and enemy AI, as demonstrated in past projects such as Ibloxx's "**Strayshot**"

Iron Frog
Feb 2025 — Mar 2026

I worked on the project **Winx Club: The Magic Is Back** as a **Game Designer**, where I was responsible for designing, documenting, and implementing a wide range of systems, including core mechanics (3Cs), levels, enemies, and bosses, among others. **More info in the portfolio.**

Divertifica
Dec 2023 — Jan 2025

I worked on the project **Macbeth: Seeds of Fate** as a **Technical Game Designer**, where I was responsible for delivering a vertical slice, from the design and documentation phase to programming and implementing the mechanics in the game engine. **More info in the portfolio.**

Blinkshot
Feb 2023 — Jan 2024

I worked on the project **Bugs 'N' Guns** as a **Technical Game Designer**. I was responsible for several aspects of the game, from the ideation phase to the final product. This included documentation, prototyping, and the final implementation of most core player mechanics, enemies, and arena encounters, among others.
More info in the portfolio.

Personal Projects

Apart from the larger projects I've been involved in, I've also worked on smaller, personal, and less time-consuming projects such as game jams and other small experiments. You can find **More info in the portfolio.**
